SURGE

Google review card — choose the look

A small card with a QR code that opens Surge's Google review page. Mark one box per section, add any notes, and hand it back. **Nothing is printed or ordered yet** — once this is marked up we produce the final print-ready files (SVG + PNG) for the print shop.

Fill in on screen with **Print → Save as PDF**, or print it and mark by hand.

1 — THE CODE ITSELF

☐ 

Surge — dark badge DEFAULT

SURGE mark in a dark chip with a green outline, centred in the code. Matches the site.

☐ 

All black, no badge

Plain code, no centre mark. The most reliable to scan, especially small or on cheap printers.

☐ 

Green badge

Same layout as the default but the centre chip is Surge green with a dark mark.

☐ 

Inverted — light on black

Light code on a black field. Looks sharp but some phone cameras will not read it — test before committing.

2 — THE CARD AROUND THE CODE

☐ **Dark card**

Black card, white text, green top edge. Matches the current website.

☐ **Light card**

White card, black text. Better if it will be photocopied a lot.

3 — THE WORDING ON THE CARD

> **Tell people how it went.**
> Scan the code with your phone camera and leave a few words — it takes about a minute.

☐ **Keep this wording**

☐ **Change it to:**

4 — WHERE IT WILL BE USED (tick any — helps us set sizes)

☐ Table tents ☐ Counter / hand cards ☐ Stickers ☐ Poster ☐ Email / digital ☐ Other

5 — ANYTHING ELSE

SELECTED BY

DATE

The code in every option points to `g.page/r/CbLJ0flOE4VvEBM/review` — Surge's Google Business Profile "leave a review" page. Live tweaking of colours and text is in **surge-review-qr-builder.html** in the same folder.
