Spend, leads and conversations: Meta, from Matthew's screenshots (the first form ad's whole run, 13–14 Oct, from 19 Oct; the second form ad and the Messenger ad, lifetime, 22 Oct about 9:20 am). Spend since then is not in these figures, so the cost per job is a little low on both sides until new screenshots come in. Jobs, prices, payments and app leads: the live app, 22 Oct about 10:20 pm. Kyle, Albert and Armah came in on 20, 21 and 22 Oct, so they are the second form ad's. Russ and Carlos are counted to the form as referrals from Eric; Peggy is not among the form leads, so she is counted as Messenger (as on 19 and 20 Oct). A Messenger conversation is not a lead: the app holds 6 Messenger leads against Meta's 62 conversations. Website arrivals: the 365 site's own server logs. Left out: Brian (in person) and Kara (referral, done before these ads).
