Doors in Sixfold

Past a million: Group 2 (Larimer, Mesa, Pueblo) went live tonight

10

Apps and sites updated

Sixfold 365, five editions, both websites, the email desk and the Hub; every upload checked

5

Waiting on you

Listed at the bottom; three before 10 am

Sixfold 365 app 13

Ad leads	LIVE Facebook ad-form leads are Jen's again from 27 Oct 5 pm. You keep the ones you'd already contacted, and every website lead.
Jen's lead logging	LIVE She ticks everything she did (texted, messaged, emailed, plus one call result) and saves once. The buttons stay on quoted leads, voicemail has one-tap notes, and leads read "Price ready" or "Quote given (texted)".
Text the quote	LIVE On the lead card and in the Quote builder: opens Messages with the price written in, or copies it for Messenger, and logs the quote as given.
Custom quotes	LIVE "Another service" in the Pipeline quote box, with your own price (Randy's native seed). It carries onto the job, the agreement and the quote page.

Aerate-only price	LIVE The Quote builder now prices aerate only: the full price less seed and fertilizer.
DIY comparison	REMOVED Taken out of the Quote builder, as you asked.
One-off jobs	LIVE "Another service" jobs (a fall cleanup), and "+ Book a job" from a customer card.
Square + visits	LIVE Payments can be matched to a visit on a customer card. Leann's $50 is tied to her 27 Oct fall cleanup, and her 4 Nov job stays unpaid.
Send to Jen	LIVE Replaces Send to Cai on your own leads.
Schedule	LIVE The days-off list folds behind "See days off".
Work hours	LIVE A proper Work hours card on Profile, and Team hours: everyone's week, gaps and who's off.
Exports	LIVE Customers or door bookings in the exact import layout of Housecall Pro, Yardbook, GorillaDesk, HighLevel, QuickBooks, HubSpot or Google Contacts, or as a general CRM file.
Address search	LIVE Finds a house however it's typed: Mtn or Mountain, Dr or Drive, a letter off or two swapped.

Doors and data 3

Group 1 re-clip	LIVE Rebuilt by parcel number (70,488 doors). Lawn, trees, roof and sun for the added doors were measured and uploaded tonight.
Group 2	LIVE 43 towns in Larimer, Mesa and Pueblo, 159,290 doors, on Sixfold and all five editions. Lawn, trees, roof and sun are still being measured (about Friday).
Roof photos	QUEUED Group 2's close-up roof photos come after its measuring, so the doors could go live sooner.

Traverse launch 8

Launch checklist	LIVE A checklist page for what has to happen before the first email, the first week, and normal startup practice.
First emails	SET Moved to 10 am Thu 29 Oct. A hold stops anything going earlier, even if you queue first thing.
FAQ	LIVE Your edits: a million properties, offline, crews' devices, setup. The accuracy and shared-sign-in questions are gone.
Legal pages	LIVE The Draft label is off the privacy and cancellation pages. The attorney also approved agreement version 2.
Screenshots	LIVE Retaken with the current look and made-up addresses.
Send yourself a test	LIVE A box on the Prospect Desk's Email page. Your test landed in Gmail's Promotions tab.
Open the site	READY Staged and checked. It runs when you say "open it".
Hub	LIVE A Website tab for traverseplatforms.com (Alt+5).

365 website 3

Social footer	LIVE Facebook, Instagram, Google reviews and Nextdoor links.
QR pages	LIVE Email goes to you (M.Sharpe@SixfoldColorado.com); call and text go to Jen.
Quote page	LIVE Shows a custom service by name.

Clients and your admin 4

Horizon audit	DONE Donny's site, company and socials, a 5-page PDF, including phone and tablet, speed (retested: you were right), search and indexing.
Lead numbers	Close rates, cost per lead and leaks, double-checked after Jen's note. Quotes she texts weren't visible to the app, which the new logging fixes.

Randy	Native seed and double or triple aeration prices for 3,000 and 3,500 sq ft.
Home Base	Your website row updated; the Prospect Desk and launch checklist added.

Running tonight

Cloud machine	Group 2 lawn, trees, roof and sun, then the roof photos. Results upload by themselves.
New-owner flags	Fixing about 500 doors wrongly marked "new owner" (the same address in two towns), then rebuilding and uploading with checks.
Roof material	Finding why the roof-material model makes no calls. A written diagnosis waits for you; nothing goes live.
8 am pre-check	A read-only launch check opens on your screen at 8: site, FAQ, hold, sending login, queue.
Server backup	2:45 am, as every night.

Waiting on you 5

Before 10 am	Say "open it" so prospects can reach the site.
Before 10 am	Fix the roofing email's "864,000 Colorado homes" (now over a million) in Prospects → Settings, or tell me to.
Before 10 am	Queue a first batch of 10 to 20 companies.
Demo	Book a test demo after the site opens, and narrow the demo hours to times you can take a call.
Google profile	Option 1 waits on the $50 card hold.

Saved on your Desktop in "End of Day Reports" and in the workspace's changelog/ folder, which is backed up. The running list of every day is CHANGELOG.md.
