END OF DAY

Saturday 31 October 2026

Everything we changed today across the apps, sites and data

Traverse prospecting · Traverse apps · Sixfold 365 · Data · Your admin

69

Changes saved

Each one recorded in the change history

219

Prospect emails

179 sent today and last night, 40 more sending overnight; 3 clicks, 0 unsubscribes, 1 bounce

230

Nextdoor pages on the desk

Up from 26 this morning; you messaged 132

7

Waiting on you

Listed at the bottom

Traverse prospecting 9

Emails	LIVE The site opened last night and the emails started: 179 sent (roofing and lawn, the app picture), daily cap raised to 240 so 10 an hour runs around the clock. 3 clicks so far (Keystone and Brian Williams on the homepage, Birdie on the demo page), 0 unsubscribes, 0 demo bookings. A third batch of 40 (20 roofing, 20 lawn, founded 2016+) is sending overnight.
Inbox test	Email setup checked (SPF, DKIM, DMARC all published). Test sends to your Gmail (picture and plain) and your Surge inbox all landed in Primary.
Nextdoor on the desk	LIVE Each company has a Nextdoor page field, a Nextdoor filter and an "On Nextdoor first" sort. Emailed, Called and Messaged on Nextdoor are now ticks that can all be on at once (you emailed a company, then Nextdoor unticked Emailed).
Finding pages	LIVE A deep crawl of 1,617 company websites found 4 more pages; the thorough web search found pages for about 4 in 10 companies. All 377 Fit A companies and the first ~200 Fit B searched: 26 pages became 230. Held for you: Birdie (address says New Jersey), Sopris Solar (2025 indictment), Highlands and Roam Roofing (closed), plus 30 unclear matches in CHECK-BY-HAND.md.
Pages that didn't work	LIVE The 27 roofing and lawn pages with an error or no owner: link taken off with a dated note; 19 of them emailed; the other 8 on a call list (Desktop › Traverse).
Bounces	LIVE The desk can now record a bounce: the card says why and the company is never emailed again. Legacy Roofers (Firestone) logged.
Nextdoor page	Bio (233 and 484 characters, inside the 500 limit), logo 500×500 and two covers 1500×600, in the website's look. Roofing message for Nextdoor; tonight a lawn version, a follow-up email for the three who clicked, and a call script (drafts, nothing sent).
Google Ads	Set up together: goal "schedule an appointment" (the demo), 13 more services, headlines and descriptions inside the limits, keyword themes and negatives. Google's generated pictures of people replaced with designed cards in all four sizes. Still needed: the tag ID and your go on the cookies line.
Website visitors	LIVE The site has no analytics, so a counter now reads the server's daily log (bots and our own visits left out). First real number after tonight's log lands; it shows in the morning check.

Traverse apps and website 6

Deep review	LIVE Overnight review: sign-in paths share one routine, the read-only check account lost the sync key, failed customer emails retry, checkout's brand step checks payment, the unsubscribe link needs a button press (mail scanners can't unsubscribe people).
Town list (TR-47)	LIVE A Yours section, search by town, neighborhood, county or ZIP, counties grouped into regions, and admins can hide counties outside their area. Spanish added.
Setup and payments (TR-48)	LIVE The sample property moved into the Setup checklist; Payments received has its own Office screen; jobs show Paid / Part paid / Unpaid.
Jobber (TR-46)	BUILT, OFF Connect Jobber is ready and waits for the Jobber developer app registration.
Home screen	LIVE Phone and tablet: Dashboard, Sales, Team, Storms and Setup each their own closed bar.
Satellite and storms	LIVE Satellite pictures cached on the server (faster maps); the storm job runs one town at a time; hail hours live on Roofing.

Map data and the cloud machine 4

Coverage audit	407 towns, 1,237,418 homes, every layer checked; the gaps became a queue on the cloud machine.
Live tonight	LIVE Larimer roof material; lawns measured again (8,602 doors, +4,517 lots); roofs and sun for 18 towns (Denver's 71,705 never-measured roofs among them); Douglas roof material for Highlands Ranch, Parker, Castle Pines and Castle Rock.
Two bugs fixed	A shared retry helper renamed every town to "1" after a retry (two stages failed, a third skipped its solar and tree passes); and the Douglas copy-back split its town list. Both fixed and rerun.
Still running	Laser-scan towns (solar and trees), trees, outlines and home values, each put live by itself when it finishes.

Sixfold 365 7

Weekly report	LIVE On Saturdays Brandon gets the daily report and then "The week" (Monday to Saturday: money, jobs day by day, next week, leads, ads). The first went out tonight: $2,778 in, 11 booked, 8 done, 5 next week.
Ad spend	LIVE Updated from your screenshot: form $1,108.78 and 67 leads, Messenger $1,415.96 and 111 chats.
Clean-up card	POSTED Fall clean-up card posted to the 365 Facebook page and Instagram on your go; caption without prices for you to paste.
November posts	8 posts and 4 Saturday photo sets, drafts only, real photos and designed cards (no generated pictures).
Emails	Thank-you email gains winter aftercare; newsletter goes to every Sixfold email (customers and leads); 2-day follow-up wording set. All still off.
365 mailbox	Sends as an alias with a Reply-To.
Google review reply	Reply written for Joe's five-star review.

Surge, Drives and your laptop 5

Surge November	Eight posts with images and a fact-check log, drafts only.
Drives	Surge Drive and both Sixfold drives reorganised into numbered folders.
Desktop	Loose files moved into Traverse, Sixfold 365, Clients & own work, Surge and Sort me. Nothing deleted; the list is in "_Desktop tidy 2026-10-31.txt".
OneDrive move	Why it failed: OneDrive wasn't running. The job now starts it first. Still parked.
Drive backup	It has stopped at the archive step since 29 Oct (no Drive copy since 28 Oct). A run by hand is going now to find the cause.

Waiting on you 7

Call Birdie Roofing	The only company that opened the demo page. Then the follow-up email on Tuesday (draft in traverse/drafts).
Google Cloud billing	The billing account behind the Gmail sign-in app has no valid card. Check it in the console (not through the email links).
Google Ads tag	The tag ID (AW-…) and your go on a privacy-policy line about Google advertising cookies, to count demo bookings.
Check by hand	Birdie's Nextdoor page, the 30 unclear Nextdoor matches, and Sopris Solar.
Rest of the Fit B search	About 1,840 companies left. Web searches are capped at 200 per turn, so it goes about two batches at a time when you're on.
More emails	Next batch on your go, after you see Monday's replies.
Call list	7 calls (Desktop › Traverse), script in traverse/drafts.

Full detail of every change: the workspace change history (git log) for 31 October, and CHANGELOG.md. This document: changelog/2026-10-31.html, with a copy in Desktop › End of Day Reports.
