END OF DAY

Monday 2 November 2026

Everything we changed today across the apps, sites and data

Practice copy · J.A.R.V.I.S. hub tab · Demo video · Prospecting

11
Changes saved
Each one recorded in the change history

245
Companies queued
Found by the website finder and added to the desk on your go

3:34
Demo video, version 1
Recorded, not uploaded anywhere

2
Waiting on you
Listed at the bottom

Sixfold 365 app 3

Follow-up email	LIVE Now a short personal note instead of the designed email: no banner, boxes, buttons or social icons, and no unsubscribe link hidden in the email header. This is so more of them land in the inbox. The offer is one sentence, links are plain, and the visible unsubscribe line and address stay.
Practice copy	LIVE A separate practice version of the app for testers such as Lance, at its own address. Made-up customers only. Every email, text, payment, phone alert and outside connection is pretended: it is written to a list called "What would have gone out" and nothing really leaves. Cards are never saved or charged. We checked that the real Sixfold app and its data did not change. Testers do not get the "See Jen's screen" tile; you keep "See through their eyes".
Water screen	LIVE The footer no longer shows source names or a file path. Fixed on Sixfold, Yards and the practice copy.

Traverse 3

Website finder	LIVE The second run found 337 websites and 263 business emails. 245 clean ones were added to the Prospect Desk and queued, on your go.
Bounce scan	LIVE Every hour the desk now reads the bounce notices in the Traverse inbox and notes them on the company before the next emails go out.
Demo video	BUILT, OFF Version 1 recorded, 3 minutes 34 seconds: Roofing, Lawn and Solar demo copies, a different voice per scene, a phone shown inside the picture, captions, a thumbnail and the YouTube text. Names, streets and data sources are masked. Not uploaded.

Email and admin 1

Peak meeting	LIVE Notes from your 2 November call saved. Peak's internal systems and website redesign are on the task list as not started.

Assistant 4

Hub tab	LIVE J.A.R.V.I.S. has its own tab in your assistant hub and opens straight into the full chat. Just J.A.R.V.I.S.: no Sixfold splash, no app behind it, no close button. Earlier lists your past chats inside the chat. Same conversations as the bubble in the app.
Your chats	LIVE Anything you open from your own account has no help-desk limits and runs on the strongest model. Jen's limits are unchanged.
Practice chat	LIVE In the practice copy, J.A.R.V.I.S. plays along as if it is changing things, then ends with "Practice copy: just testing, so nothing was really changed." It cannot change anything there.
Hub Posts tab	LIVE Synced from the live calendar.

Running tonight 3

Prospect emails	LIVE Queue keeps sending.
Bounce scan	LIVE Hourly.
J.A.R.V.I.S.	LIVE Answers Jen while the laptop is on.

Waiting on you 2

Demo video	Watch version 1 and say what to change before anything goes on YouTube.
Peak	Internal systems and the website redesign wait for your word to start.

Full detail of every change: the workspace change history (git log) for 2 November 2026, and CHANGELOG.md. This document: changelog/2026-11-02.html, with a copy in Desktop › End of Day Reports.
