END OF DAY

Tuesday 3 November 2026

Everything we changed today across the apps, sites and data

Sixfold 365 · J.A.R.V.I.S. photos and PDFs · Peak quote · Backups

17

Changes saved

Each one recorded in the change history

$3,500

Peak website quote

Sent to Brandon by you; $3,000 up front or $583.33 a week for six weeks

2

Customer payment problems fixed

Mark and Arleen could not pay their deposit links

1

Waiting on you

Listed at the bottom

Sixfold 365 app 4

Lead doubles	LIVE Ira was in your Pipeline from a Facebook ad and in Jen's from Messenger. The double check now matches the same phone, email, full name or house, and skips Lost and Couldn't reach. Pipeline cards say "Possible double" with an Open button. One of yours shows to the office only as "Already in the app as one of Matthew's leads". Add a lead also checks as it is typed. Your copy of Ira was removed as a duplicate; Jen's keeps the Thursday 5 November job. Checked live: two cards flagged, a made-up number finds none.
Old form links	LIVE Mark's form was sent three times in four minutes and Arleen's twice, and the first text could not reach the deposit. An earlier link now opens the newest form. Mark's three links tested; a made-up one is still refused.
Square deposits	LIVE Jen charged Mark and Arleen by hand because their deposit links would not pay. The Square card now offers "It's the deposit: book that day". It marks the form paid, turns off any other unpaid deposit links, adds them to Square's customers, and books the day. A form that needs a signature books when they sign.
Follow-up email	LIVE "Jen sent the details by text" is out for everyone, since she may not text them at all now that aftercare is automatic. The plan line ends "just reply if you'd like it".

Posts and content 1

Post calendar	LIVE The calendar's working copy (live since 31 Oct) is now saved in the main workspace, with the new full-size picture view.

Email and admin 2

Peak quote	SENT One-page website quote, built and reworded through the day from your phone chat. Final: six-week build, $3,000 up front (half and half) or $583.33 a week for six weeks, $3,500 total; objective is class sign-ups and memberships; written in a technical register. You sent it to Brandon. A two-page price and timeline sheet was also prepared.
Backups	LIVE Last night's GitHub copy failed (the Drive copy worked). Fixed and tested the way the backup runs. The OneDrive job on the Wi-Fi queue now treats "more folders left" as normal, and is running again on office Wi-Fi.

Assistant 3

Photos	LIVE A camera button in J.A.R.V.I.S. for everyone, Jen included: up to 4 photos per message, pasted or taken, kept private to that chat, shown as thumbnails and full size. The assistant looks at each one. The practice copy says it cannot see them.
PDFs	LIVE J.A.R.V.I.S. can make a PDF and show an Open button in the chat. Links in messages are tappable. One bug found and fixed: long file names stopped the attach.
Phone alerts	LIVE "Needs you" now goes to your phones only (before, it also went to every office login). You get one when someone else starts a new chat.

Running tonight 2

Prospect emails	LIVE Queue keeps sending.
Backups	LIVE 6 pm run: Drive and GitHub.

Waiting on you 1

Peak	Brandon's answer on the quote.

Full detail of every change: the workspace change history (git log) for 3 November 2026, and CHANGELOG.md. This document: changelog/2026-11-03.html, with a copy in Desktop › End of Day Reports.
