END OF DAY

Wednesday 4 November 2026

Everything we changed today across the apps, sites and data

Surge website audit · Peak data · Server move plan

6
Changes saved
Each one recorded in the change history

23
Surge site pages checked
0 broken links; on the test copy only, not live

$25-27
Server move, per month
Plan only; nothing bought

3
Waiting on you
Listed at the bottom

Posts and content 3

Surge site, Lance round 2	BUILT, OFF On your go, Lance's second round of notes went onto the test copy. Home: the extra paragraph is gone, "Who you work with" is now "Your support system". How Surge Works: "How we sell" with three channels (face-to-face, digital, telecommunications) and no cold prospecting. About: "Sectors we've worked in", the four teaching stages in full sentences, "We promote from within". Careers: "The roles at Surge", the resume is now asked for. The three research blog posts were taken down and saved aside. Not live.
Surge site audit	BUILT, OFF Every page read against Lance's notes and the voice rules, then checked on phone and tablet. Door-to-door wording came out of the Roofing and bio text; "Out the mud" and "close-knit" are gone; promotion is described as based on performance; the menu link now says "How we promote". Spacing and the number rail were tidied. Result: 23 pages fine, 0 broken links, 0 search-setup failures, search engines still blocked.
Booking form	BUILT, OFF Bigger consent box and a taller tap area on the privacy link, because a phone on its side crowded them. Test copy only.

Email and admin 2

Peak data	LIVE You sent Peak the permission email. A read-only reader for CourtReserve and a one-year pull are built. They only look; names, emails and phone numbers are dropped before anything is saved, and the data stays out of the backups.
Server move	BUILT, OFF A written plan with prices for moving to an Amazon Lightsail server: about $24 for a 4 GB machine, $25-27 a month with snapshots, ten steps, four of them yours. Nothing bought.

Running tonight 1

Prospect emails	LIVE Queue keeps sending; hourly bounce scan.

Waiting on you 3

Surge site	Review the test copy; launch needs your go. Before launch, the live "Call Us" button still dials the wrong number.
Server move	Your call on the plan and price.
Peak data	The read-only pull runs once the access is in place.

Full detail of every change: the workspace change history (git log) for 4 November 2026, and CHANGELOG.md. This document: changelog/2026-11-04.html, with a copy in Desktop › End of Day Reports.
