First Facebook Reel	BUILT, OFF	The first real Reel (5 pm) failed on Meta's side with no reason given. It failed again at 10 pm, while Instagram took the same video fine. Tonight's change: the calendar now reports Meta's own reason when the video step fails (live 7:53 pm). The real fix, sending the video itself, went in on 6 November.

New laptop	LIVE	The move to the new laptop was finished. Changes that were still unsaved on the old PC, and three catch-up copies taken during the move, were carried across and saved.
