Sixfold Colorado

LAWN, LAND & FIRE

From the lawn to the treeline, all year long.

LAWN REHAB

Does your lawn suck?

Thin, patchy, hard as a driveway? Hard ground sheds water instead of sucking it up, and the grass on top thins out no matter what you feed it!

1. **Aerate.** Hollow tines pull soil cores two to three inches deep, two to four inches apart. The cores stay on the lawn and break back down into it.
2. **Seed.** Overseed goes down while the holes are still open. That is the part that thickens it up.
3. **Feed.** Fertilizer the same day — all three in the one visit. Spring and fall are the windows.

LANDSCAPING	Trimming, plants and trees taken out, bed clean-up and haul-away
LAND CLEARING	Brush, undergrowth and dead fall off a lot, a pasture or an easement
FIRE MITIGATION	Defensible space and thinning, to Colorado State Forest Service standards

Any one of them, or all of it. We walk the property with you, count what is actually there, and price it from that.

WE STOPPED BY TODAY
