Waiting on you

Listed at the bottom

Sixfold 365 customer emails 8

Start time	LIVE Approved by Jen and Cai. The aftercare, 2-day follow-up and deposit reminder start Monday 8 am; the November newsletter at 9 am.
Aftercare at Done	LIVE The aftercare goes the moment a job is marked Done, balance or not. Jen no longer sends it. A balance gets its Square pay link in the email. A pop-up after Done says "Aftercare email has gone out." Cash taken on the spot now counts against the balance.
Balances	LIVE Every balance shown (aftercare, follow-up, deposit reminder) has "If you've already paid, please disregard this." under it. The follow-up no longer waits for payment; it shows the balance.
Past customers	LIVE Every past customer gets the follow-up once on Monday, Kara never. Dry check: 19 emails, all with the right name, job date and balance (Daniel $478, Alberto $403, each with a pay link). No crew notes on any, so no notes section. Old jobs leave out the "new seed" line and "Jen sent the details by text".
Brad's notes	LIVE Never word for word: the office writes the customer's version; with nothing written, nothing about extra work appears.
Deposit reminder	LIVE One email, 24 hours before the job, only when the form went out 5 or more days ahead. Jen can see who is due one.
Look	LIVE Logo header and social links on every email; the newsletter is one designed page; Jen's three aftercare tips added.
Spam fix	LIVE You added DKIM and DMARC to aeration365.com (the address the 365 emails come from), 365aeration.com and sixfoldcolorado.com. All three verified from outside; a test email went to your Gmail for the "Show original" check.

J.A.R.V.I.S. and the Sixfold app 7

J.A.R.V.I.S.	LIVE An AI chat for Jen inside the app, on your plan (no API card). Iron Man butler voice with dry humour; casual chat answered briefly. A quick reply takes about 15 seconds, with times on messages, a "working" note on longer fixes, Refresh now and one notification per reply. Blue, not the app green.
What it does	LIVE Jen's office work: leads, quotes, scheduling, payments, receipts, one-off emails. It asks her before anything reaches a customer or moves money, and asks you (here, plus a phone ping) before any bigger change to the app. It walks her through monthly plans with her own scope and price.
Pipeline	LIVE "+ Add a lead" and "Import from Meta" side by side. Sixfold doesn't show the Meta button, since those leads come in by themselves.
Back button	LIVE On a computer, Back from any Office screen returns to the Office, not Home. Fixed across every edition (14 screens had it).
Payments	LIVE The part payment box follows dark mode; Apple Pay added to Square pay links.
Ad report	LIVE Ad spend updated; Marc, Zane, Daniel and Michele counted to Messenger; Instant Form vs Messenger sheet made.
Concert ad	Ad D is the one (Jen's pick): fall cleanup and core aeration first, no area line, at the program's half-page size.

Traverse prospecting 6

Everyone, every hour	LIVE Your standing go: every emailable company queued, sending around the clock. Pace raised to 15 an hour.
Plain only	LIVE The picture email went to spam on your Surge inbox and never reached ASU; the plain one landed. The whole queue is now plain, and the 317 who got the picture version get the plain one at the end.
Added today	LIVE 105 emails from the cloud look-up, 122 companies whose website is down, the 78 on the Nextdoor list, Lainez fixed, and a follow-up to the three who clicked.
Bounces	LIVE Placeholder and broken addresses are never emailed; each bounce shows as a dated note on the company.
Nextdoor	LIVE All young-company batches searched: 230 pages became 407. Five held (pages already on another company, or signs of closing), listed in CHECK-BY-HAND.md. You can take a broken page off a card.
Calls Monday	Birdie and the 8 on your list.

Fiverr (your own work) 4

Seven gigs	SPF/DKIM/DMARC, email templates, websites, print, AI assistant, lead lists and documents. Every field fits Fiverr's limits: titles, 1,200-character descriptions, 100-character packages, 5 tags. Delivery 1 to 6 days. All in listing-sheet.md.
Images	A cover for each gig, 11 portfolio samples from real work (Sixfold shown with Brandon's OK) as images and one PDF each, and your profile photo.
Portfolio	Eight projects ready to paste, each with its images.
Status	DRAFTS Saved on Fiverr; publishing waits for the W-9 check. TASKS P-5.

Running tonight 4

Prospect emails	LIVE 15 an hour, all night.
Website finder	LIVE On the cloud machine: guessing websites for the 6,933 companies with no site and no email, keeping only pages that name the company and Colorado, then pulling business emails. About 6% hit so far. Results go on the desk tomorrow.
Hail hours	LIVE The cloud machine's every-2-minute radar job, finishing about Tuesday.
J.A.R.V.I.S.	LIVE Answers Jen while this laptop is on.

Waiting on you 6

Show original	Open the "365 email authentication" test in your Gmail: SPF, DKIM (aeration365.com) and DMARC should all say PASS. Tell me which tab it landed in.
Calls	Birdie and the 8 on Monday.
Fiverr	Tell me when the W-9 clears and we'll publish the seven gigs.
Website finder	Your OK to queue the emails it finds, if the safety check asks again.
Apple Pay	Turn it on in Square (Settings › Checkout).
Passwords	The four plain-text login files into Bitwarden.

Full detail of every change: the workspace change history (git log) for 1 November, and CHANGELOG.md. This document: changelog/2026-11-01.html, with a copy in Desktop › End of Day Reports.
