SIXFOLD LLC · INTERNAL · FOR DISCUSSION

Door App Competitor Audit

How our door app compares with eleven products sold to door-knocking, landscaping and wildfire companies, and what we are taking from them.

For Brandon, team meeting **Prepared** 3 Oct 2026 **Prices checked** 3 Oct 2026

WHERE WE LEAD

Nothing on the market puts fire hazard, trees, lawn size and wildfire funding on the same door. The door-knocking apps sell contact data and storm maps; the measuring tools are desk tools for quoting.

WHERE THEY LEAD

Homeowner phone numbers and emails, manager tools (territories, leaderboards, contracts), and precise measuring for bids.

WHAT WE'RE DOING

Taking the best of what works for them. All seven are built and go live with the next update. The leaderboard shows to admins only while it is tested, and the booking-rate sort switches on once the team has 150 conversations logged.

What our app is

Built in-house and running on the Sixfold website. Every door in 11 towns (30,464 doors) carries its wildfire hazard rating, how close trees are to the house, its lawn size with the aerial photo it was measured from, the county's appraised value (Douglas and Teller), and the Teller County wildfire plan's rating where the community is named (62 neighbourhoods).

At the door the crew sees the tax credit, grant and insurance rules, logs outcomes (with no signal if need be), notes extra work such as gutters, branches over the roof or irrigation, and books quotes. Admins get Quotes to build, won and lost, a Results screen showing which doors turn into jobs, Communities (HOAs and

Firewise sites ranked by high-risk doors), fire-weather alerts, walking routes and a Jobber export. There are no per-person fees, and the data comes from free public sources.

Who we compared

PRODUCT	WHAT IT IS	PRICE AS PUBLISHED
SalesRabbit	Door-to-door sales app	$49–75 per person/mo (Pro) + $19–31 each for homeowner data and storm data
Spotio	Field sales app	Quote only · 5-user minimum
KnockBase	Door-to-door sales app	Not published
Knockio	Door-to-door sales app	$25–35 per person/mo
SiteRecon	Aerial lawn and landscape measuring	$250–500/mo
Beam AI (Attentive.ai)	Done-for-you aerial measuring	From $10,000/yr per trade
PropertyIntel (Aspire)	Measuring for commercial landscapers	From ~$199/mo (third-party figure)
GlassHouse	Texts and emails to a neighbourhood's homeowners	$3,500/yr + $79 per hot lead or 12¢ per text
HailTrace	Storm maps, alerts and canvassing for roofers	Free tier · paid plans not published
Firemaps	Drone wildfire assessment and contractor marketplace	Seed-funded 2021 · status not confirmed
Fire Aside	Defensible-space inspection software for fire agencies	Sold to agencies

For scale: SalesRabbit Pro with its homeowner-data and storm-data add-ons comes to $87–137 per person, per month.

Where we're ahead

1. **Fire, lawn and trees on every door.** None of the door-knocking apps checked has wildfire hazard, trees near the house or lawn size.
2. **Funding at the door.** Tax credit, county grants and the 2025 insurance law, with what the crew may and may not say. Not found elsewhere.
3. **Communities.** HOAs, Firewise sites and county plan ratings grouped to pitch a whole community as one job.
4. **Our own conversion data.** SalesRabbit charges for national "buyer propensity" scores. Our Results screen learns from our own doors.
5. **A source and a date on every figure.** The lawn photo shows exactly what was counted.
6. **Clean data.** No scraped contact lists.

Where they're ahead

1. **Homeowner contact data**, licensed, with texting compliance handled (GlassHouse, SalesRabbit, HailTrace).
2. **Manager tools:** territories per rep, leaderboards, commission calculators, live rep tracking, contracts in the app.
3. **Precise measuring for bids:** turf, beds and hardscape measured separately, done for you in about 90 minutes (SiteRecon, Beam AI).
4. **"Your customers were hit" alerts** (HailTrace).
5. **Marketing around existing jobs** (GlassHouse).
6. **On-site detail:** Firemaps maps a house by drone to the centimetre and works with cities.
7. **Native phone apps.** Ours is a web app; on the iPad home screen it behaves much the same.

What we're taking from them

IDEA	BORROWED FROM	STATUS
A route around every won job, with a "we're doing your neighbour's yard" opener	GlassHouse	BUILT
When fire weather or a nearby fire hits, a call list of our customers and booked doors there	HailTrace	BUILT
A defensible-space report for the homeowner: Zone 0 checklist and photos, the evidence insurers now have to count	Firemaps, Fire Aside	BUILT
Book the walk at the door: date, time, reminder	KnockBase, Knockio	BUILT
Measure from the lawn outline the app already draws, straight into Quote Build	SiteRecon, Beam AI	BUILT
Territories per person, daily goals and a team leaderboard, without live location tracking	SalesRabbit, KnockBase	BUILT · ADMINS
Sort neighbourhoods by our own booking rate once results build up	Beats SalesRabbit's paid scoring	BUILT · AT 150 TALKS

For Brandon to decide

1. **Licensed homeowner contact data.** Worth buying, or not? If yes, only through a licensed provider and only for doors we have already spoken to.
2. **Do Not Call registration.** The federal list is free for our area codes (719, 303, 720), and Colorado's list is free for businesses under five employees. Registration is still required to download them. Whether our follow-up calls also need the Colorado Attorney General's telemarketer registration is a question for the attorney.
3. **Jobber.** The export is ready if we adopt it; nothing changes if we don't.
4. **Leaderboards.** Approved to try (3 October). Built for admins only while it is tested, without live location tracking. When should the crew see it?

Fact-check log

- **Verified on the company's own site, 3 Oct 2026:** SalesRabbit, SiteRecon, Beam AI and GlassHouse pricing (GlassHouse's page dated 2 Oct 2026); KnockBase features (offline mode, gamification, HailTrace integration); HailTrace and Spotio plan tiers; Aspire's PropertyIntel launch (1 Feb 2023, commercial landscapers).
- **From review or news sites:** Knockio pricing (Capterra); PropertyIntel's ~$199/mo (MyQuoteIQ, a competitor's blog); Firemaps (TechCrunch, Aug 2021, and a West Hollywood program page); Fire Aside (Tahoe Living With Fire).
- **Unresolved:** KnockBase, HailTrace and Spotio do not publish prices. Firemaps' current status is not confirmed.
- **Do Not Call:** FTC fiscal-2027 fees (from 1 Oct 2026; first five area codes free); C.R.S. 6-1-905(3)(b)(II) (no fee under five employees); Colorado Department of Law, telemarketing registration.
