BEFORE YOU PAY FOR FIRE MITIGATION

Two parties will help pay for it.

Most homeowners are told about neither, and **neither is a grant you wait in line for**.

> **Colorado's tax credit** covers 100% of what a contractor charges you for qualifying vegetation work, up to a cap. No application, no waiting list — you claim it on your state return.

> **Your insurer** has had to show you your wildfire risk score in writing every year since 1 July 2026, and give a discount for mitigation you can document.

WHAT WE DO

- Felling, removal and trimming
- Brush, dead fall, slash and chipping
- Stump grinding
- Defensible space and thinning
- Mowing, edging, beds and planting
- Clean-up and haul-away

> **Free guide, nothing asked for.** Where embers actually get in, the seven places a house catches, and the three zones measured from your wall. Most of it is a weekend and none of it needs us.
