One form lead, three jobs?

365 Aeration & Seeding · Instant Form ad · as of Monday 19 October 2026 · internal

Eric came in through the Instant Form ad. Russ lives about 150 feet from him and came in the same day. Carlos came in two days later, while the crew was working that street. All three were done on Friday 16 October. It looks like Eric's job brought in his neighbours, but nothing in the records says who sent whom.

The three customers

Customer	Came in	How	Where	Job	Price
Eric V.	Wed 14 Oct, morning	Instant Form ad	Newhall Dr, Highlands Ranch	Fri 16 Oct, Brad	$200
Russ K.	Wed 14 Oct, evening	Referral (ClickUp)	Townsend Dr, about 150 ft from Eric	Fri 16 Oct, Brad	to confirm
Carlos P.	Fri 16 Oct, afternoon	Referral	not recorded	Fri 16 Oct, Brandon	$175

What it means for the form ad

$56
Cost per job as counted now
$169.28 spent ÷ 3 jobs (Eric, Jeremy, Sreenivas)

$34
If Russ and Carlos came from Eric
$169.28 spent ÷ 5 jobs

Either way the form ad has done far better than the Messenger ad, at $215 per job. Counting the neighbours, one $8 lead from the form turned into three jobs.

Still open

Who sent Russ and Carlos	Brandon would know. Until then they stay as referrals and are not counted to the ad.
Carlos's address	Never entered, so the app cannot show whether he is on the same street.
Russ's price	Not set in the app; $200 is recorded as paid.

From the live app on 19 October: lead dates, sources, addresses and jobs. Distance worked out from the two houses' map points (0.03 miles). Spend from Matthew's Meta screenshots. Russ's source follows Jen's ClickUp (Referral); the app had him as Instant Form.
